1. Introduction

Welcome to the FIP Development Goals Dashboard User Guide

This guide is designed to support users of [the FIP DGs Indicators Dashboard](#). It includes:

➤ **An Overview:**
Introducing the FIP
Development Goals
Indicators Dashboard and its
purpose

➤ **User Instructions:**
Step-by-step guidance on
how to navigate and use
the current version of the
dashboard

2. About the FIP Global Pharmaceutical Observatory (GPO)

2.1 The value of data and intelligence

Data and Intelligence:

For the profession

provide evidence to advocate for pharmacy's role, support workforce planning and education, and strengthen global credibility.

For global health

highlight pharmacists' contributions to universal coverage, inform policies, and drive innovation to achieve better health outcomes.

FIP members

offer access to trusted intelligence, enable benchmarking and collaboration, and support evidence-based decisions aligned with global priorities.

2.2 Background

The [FIP Global Pharmaceutical Observatory \(GPO\)](#) serves as a **worldwide data hub**, informing the advocacy work of our members and partners in various areas such as:

- policy development,
- decision-making,
- the advancement of pharmaceutical practice, health and life sciences, education and skills training, and workforce intelligence.

2.3 Vision

To be the **most comprehensive** and **most respected** source of data and intelligence on the pharmacy workforce, pharmacy practice and pharmaceutical science worldwide.

We provide a window on the work and impact of the global pharmaceutical community wherever you are.

2.4 Mission

Strategic information and reports on application of policies, practices, and services

Communication of data and intelligence to promote member organisations (MO) impact on health

Collation of valid global data on pharmacy workforce, practice and pharmaceutical science

Comprehensive analyses to provide accessible, high-quality intelligence

2.5 How does the GPO help the entire profession?

- The GPO was originally established in 2012 as a workforce observatory. More recently, it has evolved into the areas of practice and science as well.
- The term 'observatory' refers to the function of monitoring the pharmaceutical workforce/education, practice and science together with trends, using standardised, objective and verifiable methods.

Key benefits for the profession

The FIP GPO

- monitors the pharmaceutical workforce, practice, and science trends globally, providing evidence-based reports and intelligence to our member organisations and partner organisations.
- supports advocacy efforts, promotes effective policy-making, and reinforces the profession's impact on a global scale.

2.6 FIP GPO as member benefits

As a FIP member, FIP GPO can help you by...

Providing opportunities to collect and interpret data that leads to impactful outputs

Sharing and disseminating intelligence that informs policy formation and advocacy for the profession

Monitoring of countries and comparing information

Conducting research and analysis

Evaluating trends to support action planning

Enabling collaborative working

Facilitating the building of national and inter-country networking

Building capacity for workforce, pharmacy services, pharmaceutical science and medicines

Seeking links with other observatories e.g. WHO and OECD

Contributing to health systems strengthening by tracking progress against development goals

2.7 Health transformation: A new FIP Strategic Plan 2025-2030

Via the FIP GPO, we will ensure delivery of the imperatives by 2030 through data-driven policies and evidence-based developments.

3. About the FIP Development Goals Dashboard

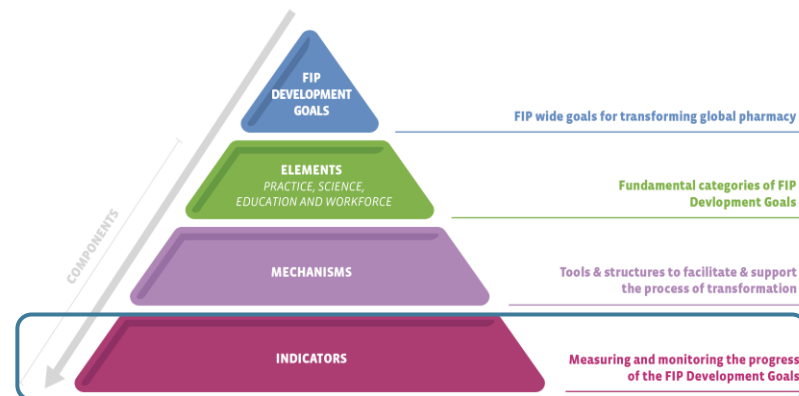

A global dashboard that measures the progress of pharmacy professional practice transformation

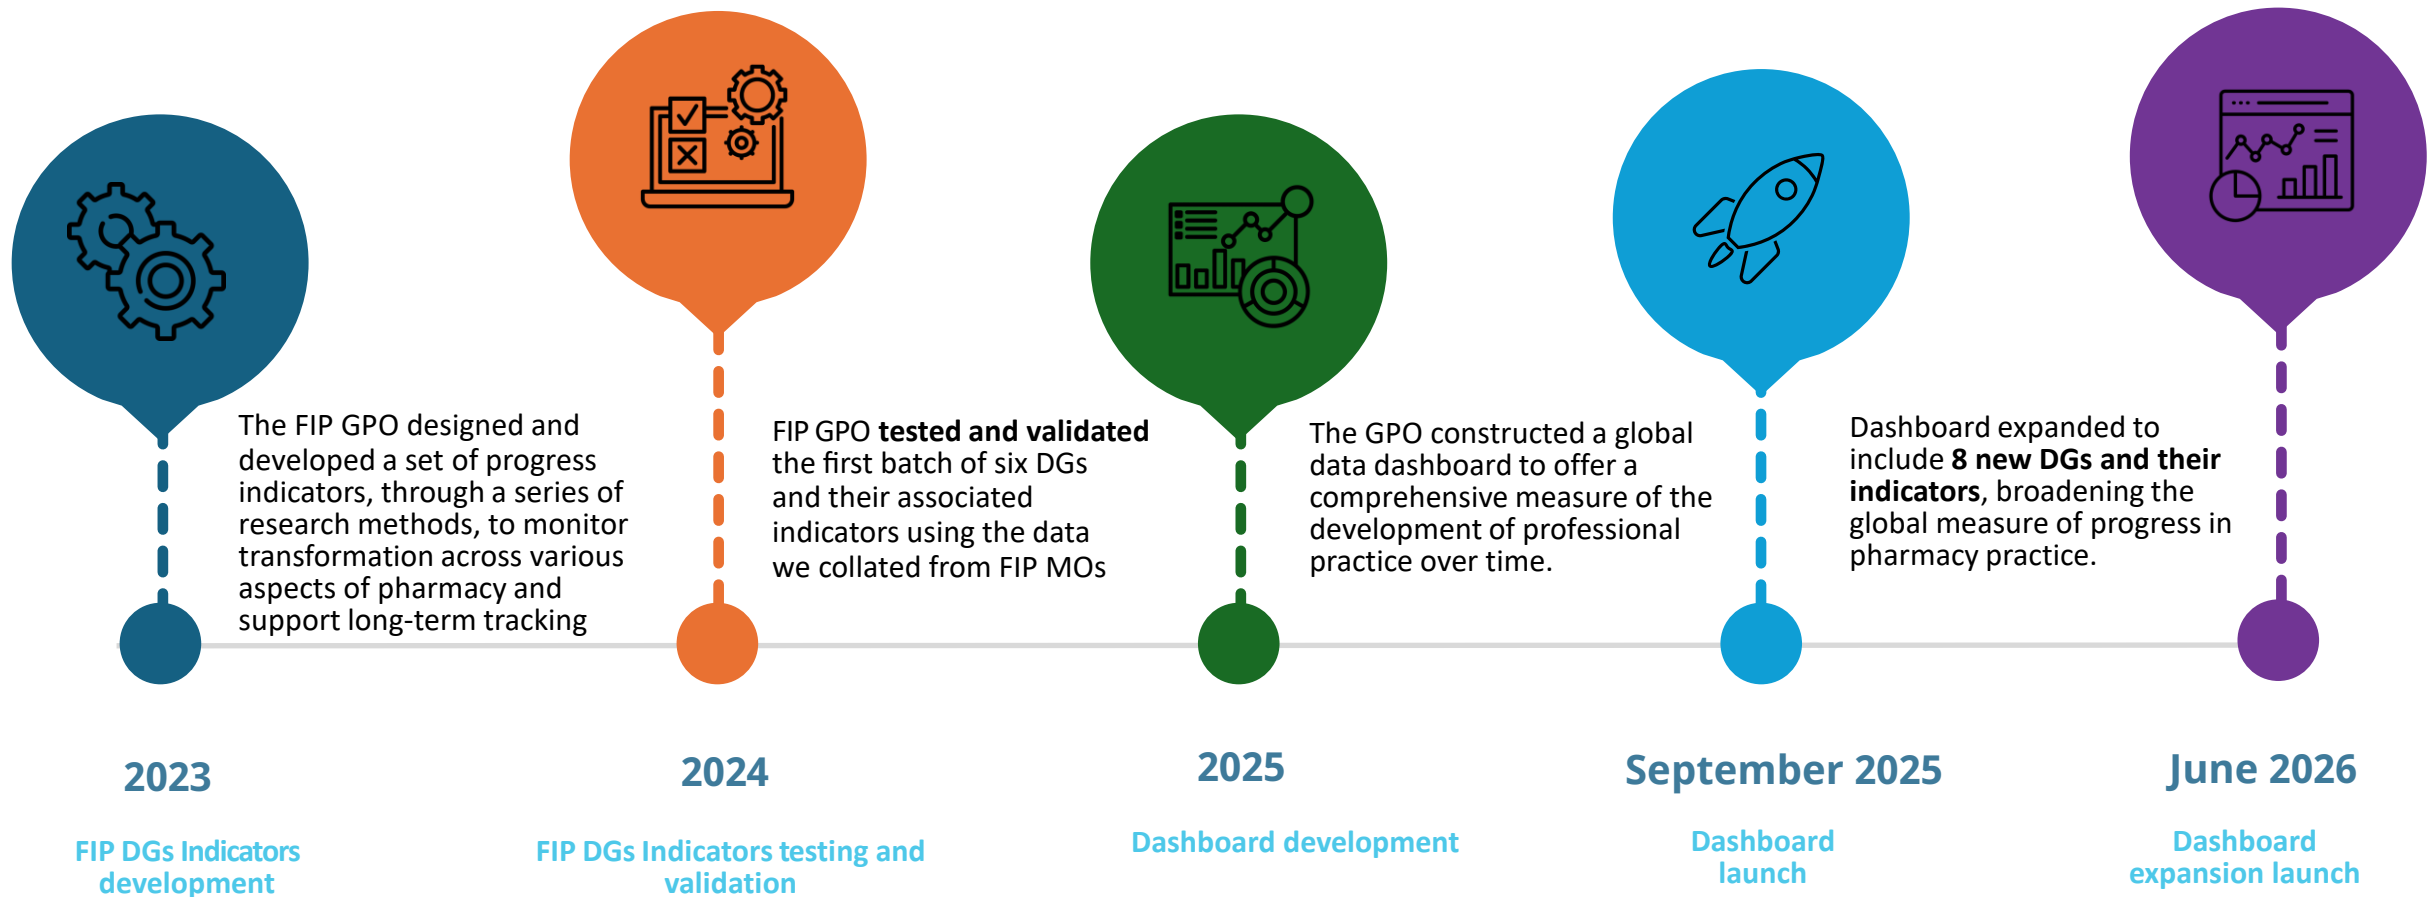

3.1 Background

The FIP Development Goals (DGs) provide a global framework for needs assessments and prioritisation for member organisations, serving as a key resource for transforming the pharmacy profession globally, regionally, and nationally over the next decade.

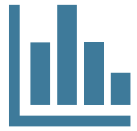

- To support MOs in the implementation of the FIP Development Goals, a set of progress indicators was developed by the FIP Global Pharmaceutical Observatory (GPO).
- These indicators were designed to monitor advancement and alignment across countries, using data submitted by FIP Member Organisations (MOs).

3.2 FIP DGs Indicators development progress

3.3 Purpose

The FIP DGs indicators dashboard provides an **interactive, data-driven platform that visualises** country-level progress across the 21 FIP DGs. The dashboard also shows **alignment, implementation, and transformation progress** at global, regional, and national levels.

FIP **Members** can explore national advancement and compare their progress with other countries.

3.4 Dashboard benefits for FIP MOs

Identify where improvements are needed

Set priorities for quality improvement and support

Benchmark performance against other countries

Support national quality improvement schemes

Demonstrate the progress that pharmacy is making in support of health systems outcomes

4. Navigating the FIP DGs Indicators Dashboard

To access the FIP DGs Indicators Dashboard, visit:
[FIP Development Goal Indicators Data Dashboard](#)

4.1 FIP DGs Indicators category descriptions

Indicators Category	Description
Capacity	Data expressed as numbers, e.g. number of pharmacists/pharmacies, pharmaceutical facilities available (universities, services)
Impact	Provision of Pharmaceutical services that support better health care and outcomes
Policies & regulatory systems	Regulations and strategies as drivers to shape the structure of the system and benefit populations
Training & Professional development	Focus on developing competencies and skills across all sectors and career stages.
Pharmaceutical services & facilities	Focus on the availability of pharmaceutical services, facilities & infrastructures needed.

4.2 FIP DGs Indicators Dashboard

The FIP DG Indicators Dashboard comprises six pages

Homepage

The “homepage” provides users with a starting point to explore the FIP Development Goals (DGs) Indicators Dashboard. Its aim is to give a global overview of progress on the DGs by:

- Displaying a **world map** for quick navigation and country selection.
- Presenting a **data table** with detailed information by country, member organisation, DG, indicator description, category, and status.
- Allowing users to filter and explore data through **interactive slicers**.
- Linking to the **list of indicators and category descriptions** for further reference.

This page is designed to help users quickly locate their country or region, review the indicators reported, and gain an overall picture of implementation progress across the 14 tested FIP Development Goals.

The screenshot displays the 'FIP Development Goals Indicators' website. At the top, the title 'FIP Development Goals Indicators' is prominently displayed. Below the title, there is a grid of 21 numbered indicators, each with a unique icon and a brief description. The indicators are arranged in four rows: the first row has 6 indicators (1-6), the second row has 6 indicators (7-12), the third row has 6 indicators (13-18), and the fourth row has 3 indicators (19-21). Each indicator card includes a number, an icon, and a short description of the goal. Below the grid, a navigation bar contains six icons with corresponding labels: 'Homepage', 'Goal comparison', 'Country comparison', 'Goals per country Global report', 'Global Filter', and 'Regional report'. At the bottom of the page, there is a section titled 'Download the list of indicators for the 14 FIP Development Goals here' followed by a download icon. The footer includes social media icons for a globe, LinkedIn, Facebook, and a crossed-out icon.

Click to **download** the list of indicators and category descriptions.

FIP Development Goal Indicators Data Dashboard

A global measure of pharmacy professional practice transformation progress

The FIP DGs indicators dashboard offers an interactive, data-driven platform that visualises country-level progress across the 21 FIP Development Goals and their associated indicators over time. This tool supports the assessment of alignment, implementation, and transformation progress at the global, regional, and national levels. It allows FIP member organisations and nations to explore their own advancement towards the DGs and compare their performance with that of other countries.

To date, FIP has tested and validated 14 DGs and their associated indicators (DG1, DG2, DG4, DG5, DG6, DG9, DG10, DG11, DG12, DG16, DG17, DG18, DG19, and DG20). We invite you to review your organisation's data and share any updates with us at observatory@fip.org.

If your member organisation has not yet contributed, please submit your completed form using the relevant link below for the Development Goals (DGs) covered.

Please use this link here [\[🔗\]](#) to submit your completed form for DG1, DG10, DG17, DG18, DG19, and DG20.

Please use this link here [\[🔗\]](#) to submit your completed form for DG2, DG4, DG5, DG6, DG9, DG11, DG12, and DG16.

This dashboard reflects data submitted by FIP Member Organisations (MOs) and may not represent the full national context. Data completeness and applicability may vary across countries depending on the MO's scope and mandate.

- Click on a DG to view its description.

- Select one or more items from the drop-down list.

- Serves as a quick filter, enabling users to select a country directly.

- Displays detailed information such as the **country, MO, DG, indicator description, indicator category and status**, along with all resources shared by each Member Organisation (e.g., guidelines, policies, or other documents related to the existence and implementation of DGs and indicators).

Compare indicators across FIP DGs for all MOs page

The “DG comparison” page enables users to assess progress across multiple FIP DGs by:

- Displaying **average implementation levels** of individual indicators across all FIP MOs.
- Providing a **colour-coded overview** (0–25%, 25–50%, 50–75%, 75–100%) that reflects the extent of data reporting and implementation.
- Supporting cross-goal comparison to track how MOs are advancing towards different DGs.

This page helps users understand the relative progress of each indicator, highlighting strengths and opportunities for further development across the 14 FIP DGs that were tested.

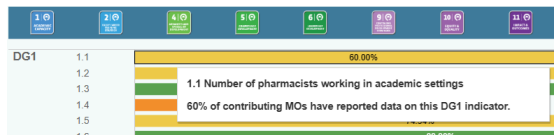

“DG comparison”
page

The page displays the average level of implementation for each indicator and its corresponding goal **across all Member Organisations**.

For example, as shown here, 60% of all Member Organisations reported data on the DG1 indicators, providing an overview of collective progress.

Compare indicators across FIP Development Goals for all member organisations

Member organisations with data by FIP Development Goal and Indicator

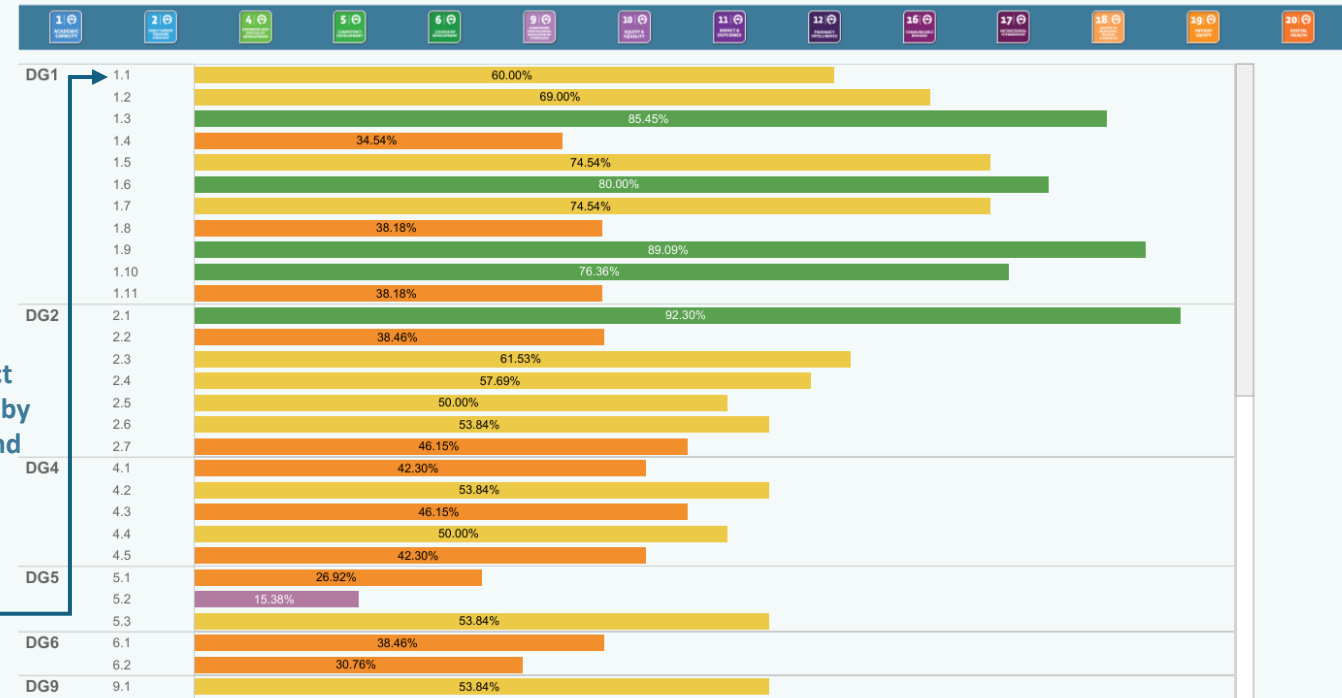

This page displays a comparison of indicator implementation across selected FIP DGs, showing the average indicator performance by MOs, based on available data.

For example, 60% of all MOs have reported data on this DG1 1.1 indicator, reflecting overall implementation progress.

For DG1, DG10, DG17, DG18, DG19 and DG20, averages are based on 55 FIP member organisations representing 48 countries.

For DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16, averages are based on 26 FIP member organisations representing 23 countries.

Compare FIP MOs across FIP DGs (*Across indicators*) page

The “country comparison” page provides users with a country-level view of progress across the FIP DGs by:

- Displaying the **average percentage of indicators reported** for each goal by MOs.
- Highlighting differences in **data availability and implementation progress** between countries.
- Using a **colour-coded scale** (0–25%, 25–50%, 50–75%, 75–100%) to make variations in reporting and implementation easy to interpret.
- Enabling users to **benchmark** their country’s progress against others to identify strengths, gaps, and areas for further development.

This page supports comparative analysis across countries, showing how individual MOs contribute to the global picture of DGs implementation.

Compare FIP member organisations across FIP Development Goals

(Average across indicators in percent)

This page displays a country-level comparison of data availability across FIP Development Goals (DGs), showing the average percentage of indicators with data reported for each goal by member organisations.

A higher percentage reflects stronger data reporting and implementation activity related to that goal. For example, a score of 90.90% for the Argentine Pharmaceutical Confederation under DG1 means that 90.90% of the DG1 indicators have data reported by the country's member organisation(s), reflecting implementation progress.

This page provides a country-level comparison of data availability across FIP DGs.

It shows the **average percentage of indicators with reported data** for each goal and MO.

For example, a score of **90.90% for the Argentine Pharmaceutical Confederation under DG1** means that nearly all DG1 indicators have reported data, highlighting significant implementation progress. To note, DG1 has a list of **11 indicators**.

“Country comparison” page

Higher percentages indicate stronger data reporting and greater implementation activity for that goal.

Select data by legend

Compare FIP MOs across FIP DGs (*by goal and indicator*) page

The “goals per country” page provides a detailed view of the FIP DGs indicators reported by each MO by:

- Displaying **indicator-level data** for each MO, including status by goal and description.
- Supporting **filtering by country, region, and MO** for tailored exploration.
- Enabling FIP MOs to **identify** their own strengths, gaps, and areas where further development is needed.
- Provide transparency on how individual indicators contribute to overall DG implementation progress.

This page helps users drill down into country-level details, moving beyond averages to understand progress at the indicator level.

Regional summary report page

The “regional summary report” page allows users to compare progress on the FIP DGs across WHO regions by:

- Showing the **average availability of data and progress implementation** across indicators for each DG by region.
- Providing insights into **regional strengths and gaps** in implementation.
- Enabling comparisons between WHO regions to identify where additional focus or support may be needed.
- Help highlight **variation in DG implementation progress** globally, offering context for regional priorities.

This page supports regional-level analysis and benchmarking, helping MOs and stakeholders understand progress in their own region relative to others.

Regional Summary Report

This page displays the average availability of data across indicators aligned with the FIP DGs by WHO region, based on the percentage of FIP MOs that have submitted data. This supports regional comparisons of progress and helps identify areas where additional support or focus may be needed.

Note:

Africa: Data are based on (7 countries, 7 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (3 countries, 3 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

Americas: Data are based on (5 countries, 5 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (2 countries, 2 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

Eastern Mediterranean: Data are based on (6 countries, 8 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (5 countries, 5 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

Europe: Data are based on (22 countries, 24 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (8 countries, 10 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

South-East Asian: Data are based on (2 countries, 3 FIP MOs) for DG1, DG2, DG4, DG5, DG6, DG9, DG10, DG11, DG12, DG16, DG17, DG18, DG19 and DG20.

Western Pacific: Data are based on (6 countries, 8 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (3 countries, 3 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

World: Data are based on (48 countries, 55 FIP MOs) for DG1, DG10, DG17, DG18, DG19 and DG20 and (23 countries, 26 FIP MOs) for DG2, DG4, DG5, DG6, DG9, DG11, DG12 and DG16.

This page presents regional averages of data availability across indicators, **grouped by WHO regions**.

It allows quick **comparison of progress between regions** and highlights regional strengths and gaps.

Total number of participating countries/ FIP MOs per region

5. Disclaimer

This dashboard reflects data submitted by FIP Member Organisations (MOs) and may not represent the full national context.

Both completeness and applicability of data may vary across countries depending on the scope and mandate of the MO.

6. Feedback and Participation

We value your feedback!

This data dashboard is currently in its **testing phase**, providing an opportunity for members to explore its features and provide feedback. Your insights are important for enhancing its functionality and user experience. If you have any questions or need support, feel free to contact the GPO team at observatory@fip.org.

If your organisation has not yet submitted a response, we invite you to do so. Responses should come from the national pharmacy professional association in the country.

Your participation will support the sharing of best practices and policies across FIP MOs and contribute to global pharmacy development.

Link: [DGs
Indicator survey
\(Part 1\)](#)

Link: [DGs
Indicator survey
\(Part 2\)](#)

Next steps

As part of our ongoing work, a **new survey will soon be disseminated** to test and validate the final set of DGs and their indicators.

The entire profession are welcome to participate.

We would greatly appreciate your continued participation, which will help expand the dashboard and share best practices across our global network.
